

## **Polyester Film**

We are manufacturers and suppliers of Polyester Film, which conforms to international quality standards. These are melting at high temperature. Available in 6 micron to 250 micron. Our films are widely used in various industries packaging & wrapping due to their additional advantage of thermal resistance, which protects these films from melting during lamination process. These are available in standards sizes & dimensions, and can be customized as per the specifications provided by the clients.

### **Application of Polyester Film:**

These Polyester Film are made using high quality material and posses some of the best features. Thus, these polyester films find wide application in many industries like: Electronics industry, Heat Transferring, Inject Printing, Blistering, Screen Printing, Offset Printing, Flexo Printing.

### **Product Details:**

Transparency: Transparent

Hardness: Soft

Thickness: 6 micron-250 micron

Width: 200mm---2500mm

Core Tube: 3" 6"

Unit Pack: 300m 600m 1200m /roll or as requirement

Package: Pallet packaging or Plywood pallet packaging ,or as requirement

Delivering: Ready if with stock or within 5-7 days for producing.
