

6 Micron PET Transparent Film, Polyester Film

We are manufacturers and suppliers of Polyester Film, which conforms to international quality standards. These are melting at high temperature. Available in 6 micron to 250 micron. Our films are widely used in various industries packaging & wrapping due to their additional advantage of thermal resistance, which protects these films from melting during lamination process. These are available in standards sizes & dimensions, and can be customized as per the specifications provided by the clients.

Application of Polyester Film:

These Polyester Film are made using high quality material and posses some of the best features. Thus, these polyester films find wide application in many industries like: Electronics industry, Soft Packaging industry, Food products packaging industry, Aluminum Lamination, Heat Transferring.

Product Details:

Transparency: Transparent

Hardness: Soft

Thickness: 6 micron--250 micron

Width: 300mm---2500mm

Core Tube: 3" 6"

Unit Pack: 6000m 12000m 18000m 24000m 36000m/roll

Package: Pallet packaging or Plywood pallet packaging ,or as your requirement

Delivering: Ready if with stock or within 5-7 days for producing.
